

Special Issue

Risk Assessment and Management in Complex Marine Systems

Message from the Guest Editor

There is significant interest in industry, authorities, and academia on the risk assessment and management of marine systems. The safe operation of automated and autonomous marine systems requires close coordination between human operators, (onshore) organization, and technical systems. This Special Issue aims to gather the latest development on risk assessment and management of operators, organization, and system components of complex marine systems and their interactions. The risk level of marine systems provides valuable information on optimal designs and decision scenarios in emergency situations. Novel techniques in risk-based design and risk-informed decision making of complex marine systems are encouraged for publication.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
