

Special Issue

Smart Technologies for Shipbuilding

Message from the Guest Editor

This Special Issue focuses on smart technologies, with a specific focus on the shipbuilding. Smart technologies such as AI, big data, and digital twin are emerging area and gaining popularity with the wave of 4th Industrial Revolution. It is expected that the application of smart technologies in the shipbuilding industry will bring improved global industrial competitiveness through unmanned, autonomous, and intelligent production. We invite researchers from both academia and industry to submit original articles that advance state-of-the-art smart technologies or review the progress and future directions of research in this field. The scope of the Special Issue covers the range of subjects relevant to shipbuilding.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
