Monitoring and Assessment of Marine Environmental Pressures

Message from the Guest Editor

The ocean is vital to life on Earth. The many ecosystem services that it provides, related to provisioning, regulating, supporting, and cultural aspects, are also fundamental to the Blue Economy. It is imperative that relevant monitoring and assessments of the ocean, connecting human activities with pressures on marine ecosystems, are prioritised. As the seas become busier, there is a need for marine planning to optimise the benefits of the sea while ensuring that these benefits will be available to future generations. Fundamental to all this is the delivery of the correct monitoring and assessments that identify the main pressures, can detect environmental change, and ensure that the cause of the environmental change can be characterised, as well as showing whether or not the actions taken have delivered the desired outcomes. Research articles, review articles, and case studies are welcome.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
