

Special Issue

Advances in Offshore Geotechnics

Message from the Guest Editors

Coastal areas house a major portion of the global population, also providing an important engine for economic activities. Offshore geotechnics play a crucial role in the development and expansion of coastal infrastructure for the effective utilization of natural resources from the ocean and lakes. The increasing natural hazard risks associated with climate change (i.e., shoreline erosion, hurricanes, wave surges, tides, coastal floods, etc.) present novel challenges for geotechnical engineering. This Special Issue entitled “Advances in the Offshore Geotechnical Engineering” solicits papers concerning recent progress in the geotechnical theory and applications in this important domain.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
