

# Special Issue

## Offshore Wind Turbine Foundations

### Message from the Guest Editors

There have been tremendous developments in offshore wind energy during the past ten years. As a key component, offshore wind turbine foundation, either bottom-fixed or floating, plays a critical role in the dynamics and stability of the whole system. Therefore, there is a large ambition to develop various kinds of foundation technology. This Special Issue focuses on various foundation design, analysis, model tests, installation, and also economic issues.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
