

# Special Issue

## Advances in Position Mooring

### Message from the Guest Editors

For this Special Issue, we would like to invite the submission of papers dealing with position mooring in a broad sense. This includes both experimental and numerical investigations on physical phenomena (e.g., snapping and strumming), fatigue monitoring, and condition monitoring. We are especially interested in work that aims to reduce the uncertainties associated with mooring dynamics, such as ground interactions, cable material modelling, and internal damping effects. Additionally, papers presenting innovative solutions to mooring design problems—including designs for newly emerging fields, such as floating solar parks, offshore aqua-culture, and mega-islands—are highly encouraged.

---

### Guest Editors

Prof. Em. Lars Bergdahl

Prof. Dr. Claes Eskilsson

Dr. Guilherme Moura Paredes

Dr. Johannes Palm

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
