

Special Issue

Propulsion of Ships in Waves

Message from the Guest Editor

The study of the propulsive characteristics of ships moving in waves (regular or random seas) is of major importance since it is directly related to the fuel consumption and their overall energy efficiency. For designers, the ultimate goal should be a computational tool that predicts the real situation of a full-scale self-propelled ship. However, this is an extremely complicated task which also requires excessive computing power. This is why, in practice, many simplified methods have been employed, based on empirical methods, lower order computational tools or advanced CFD codes in order to explore issues regarding the engine–propeller–hull interaction. Many of them are based on the analysis of in situ measurements or towing tank experiments. The purpose of this invited Special Issue is to present relevant approaches which exhibit high interest for the ship-building industry, the scientific community and engineers involved in ship operation management.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
