

## Special Issue

# Ocean and Shore Technology (OST)

### Message from the Guest Editors

Ocean and Shore Technology (OST) encompasses the vast field of ocean engineering and any structure that is used in the “Shore” including onshore, nearshore, and offshore. These structures are required to navigate and withstand harsher environmental conditions with global weather changes and ever expanding global economic activities. While new design innovations are required to meet the challenges posed, the traditional methods need to be improved to ensure that structures survive in new (harsher) limits. To meet these challenges, in addition to state-of-the-art engineering, a better understanding of structural dynamics and structural behaviour is required. Therefore, we are inviting you to submit original work for this Special Issue on “Ocean and Shore Technology (OST)”.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
