

Special Issue

Structure-Seabed Interactions in Marine Environments

Message from the Guest Editors

The safety and resilience of offshore development, including exploration of fossil and renewable energy and construction of offshore transportation, primarily depend on the stability and deformability of the offshore structure. Offshore structures include but are not limited to a fixed platform, offshore wind turbine foundations, underwater tunnels, cross-sea bridges, floating facility, and submarine pipelines. Meanwhile, the soil conditions of the seabed are often unusual, particularly in respect of carbonate soils, gassy soils, and structured sensitive soils. The scope of this Special Issue is to gather original fundamental and applied research concerning experimental, theoretical, computational, and case studies that contribute toward an understanding and improvement of offshore structure–soil interaction. The topics include but are not limited to SSI associated with problems of:

- Marine sediment characterization;
- Offshore oil and gas production;
- Offshore renewable energy infrastructures;
- Port and coastal disaster prevention;
- Submarine/cross-sea transportation.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
