

Special Issue

Modern Technologies and Methods of Development for the Maritime Industry

Message from the Guest Editor

The term maritime refers to almost everything connected to the sea or waterways throughout the world, especially in relation to navigation, shipping and marine engineering. The industry has a direct impact on much of our everyday lives. The issues of navigation, pilotage and decision making are considered. This Special Issue is also devoted to the thematic area of automation systems and information systems for the maritime industry. Recently, this area of study has been changing very rapidly and there are many implementations in the technological and general cycles. The development of the industry requires research in various fields of engineering, such as robotics, automation, neural networks and ecology, among others. This research will significantly contribute to the development of the maritime industry as a whole. The Special Issue will be interesting to both professionals and ordinary readers who research in and are interested in the maritime industry.

About the Journal

Message from the Editor-in-Chief

Journal of Marine Science and Engineering (JMSE, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi

School of Engineering, The UWA Oceans Institute, The University of Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.5 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
