

Special Issue

Underwater Imaging

Message from the Guest Editor

Underwater imaging is an important topic in Marine Science and Engineering because it deals with the development of new technologies and techniques related to the acquisition and processing of images and 3D data in underwater environments. Challenges associated with improving the visibility of objects at various distances have been difficult to overcome due to the absorptive and scattering nature of seawater.

Mitigating these effects has been the focus of the underwater imaging community for decades, but recent advances in hardware, software and methods has led to relevant improvements in several application areas (e.g.: biology, geology, archaeology, offshore engineering). Anyway, the exploration, documentation and recording of underwater environments still remain challenging tasks that stimulate the research, design and development of new sensors, devices, techniques and methods for recording underwater environments. This Special Issue is launched to collect a compilation of current state-of-the-art and future perspectives in the development of underwater imaging technologies.

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
