

## Special Issue

# Water Pollution under Climate Change in Coastal Areas

### Message from the Guest Editor

The goals of this Special Issue are to provide a current overview of water pollution under climate change in coastal environments. This Special Issue invites research and reviews dedicated to all aspects of water pollution and climate change in marine environment. Papers on field studies may focus on but are not limited to eutrophication, algal bloom, seawater acidification, carbon cycle (carbon neutrality), and emerging pollutants in marine environment. Articles on modelling may include but are not limited to developing new models or applying current models to research water pollution and climate change in marine environment. Results from experiments, time-series and space-for-time analysis, meta-analyses, and modelling are all welcome.

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

### Author Benefits

#### High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei  
Compendex, GeoRef, Inspec, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean  
Engineering)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 15.6 days after  
submission; acceptance to publication is undertaken in 1.9  
days (median values for papers published in this journal in  
the first half of 2025).
