Feature Papers in Ocean Engineering

Message from the Guest Editor

We are pleased to announce the launch of a new Special Issue on “Feature Papers in Ocean Engineering”, with the aim of contributing to the publication of high-quality research on all the main aspects of Ocean Engineering—from ocean wave modelling aspects (ocean wave motion, fluid–structure interactions and tsunamis, etc.) to seabed mechanics and sediment transport, marine geotechnics and geohazards, ocean energy (offshore wind, wave energy, tidal current and combined marine energy) and field studies in ocean or marine environments. Submissions of original and high-quality research on all the abovementioned branches of ocean engineering are encouraged.
