## Feature Papers in Ocean Engineering

### Message from the Guest Editor

We are pleased to announce the launch of a new Special Issue on “Feature Papers in Ocean Engineering”, with the aim of contributing to the publication of high-quality research on all the main aspects of Ocean Engineering—from ocean wave modelling aspects (ocean wave motion, fluid–structure interactions and tsunamis, etc.) to seabed mechanics and sediment transport, marine geotechnics and geohazards, ocean energy (offshore wind, wave energy, tidal current and combined marine energy) and field studies in ocean or marine environments. Submissions of original and high-quality research on all the abovementioned branches of ocean engineering are encouraged.

## About the Journal

### Message from the Editor-in-Chief

*Journal of Marine Science and Engineering (JMSE*, ISSN: 2077-1312) focuses on research in the fields of Ocean Engineering, Coastal Engineering, Physical Oceanography, Geological Oceanography, Marine Biology, and Marine Environmental Science. It publishes reviews, regular research papers, and short communications, as well as Special Issues on particular subjects. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers.
