

Special Issue

Marine Measurements: Theory, Methods and Applications

Message from the Guest Editors

The implementation of modern and innovative research and technical and organizational solutions from various scientific disciplines is a fundamental issue related to the use of oceans and seas for human needs. This activity requires that the implemented solutions are thoroughly verified through theoretical research, modeling, and application verifications. Therefore, marine measurements are important in the development of marine science and engineering, which form the basis for scientific research, ensuring the dynamic development of this activity. This Special Issue focuses on the latest and innovative solutions in the field of marine measurements that serve the sustainable use of human's oceans and seas. They also have a positive impact on the protection of the marine environment and climate, ensure the safety of maritime activities, and also include infrastructure at sea, as well as increasing the level of protection of human life at sea. Topics of interest for the Special Issue include, but are not limited to oceanography, navigation, hydrography, marine geodesy, mapping, photogrammetry, remote sensing, and civil engineering.

Guest Editors

Prof. Dr. Cezary Specht

About the Journal

Message from the Editor-in-Chief

The *Journal of Marine Science and Engineering* (JMSE, ISSN 2077-1312) is an international peer-reviewed open access journal which provides an advanced forum for studies related to marine science and engineering. The journal aims to provide scholarly research on a range of topics, including ocean engineering, chemical oceanography, physical oceanography, marine biology and marine geosciences. We invite you to publish in our journal sharing your important research findings with the global ocean community.

Editor-in-Chief

Prof. Dr. Charitha Pattiaratchi
School of Engineering, The UWA Oceans Institute, The University of
Western Australia, Perth, WA 6009, Australia

Author Benefits

High Visibility:

indexed with Scopus, SCIE (Web of Science), Ei
Compendex, GeoRef, Inspec, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Marine) / CiteScore - Q2 (Ocean
Engineering)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is
provided to authors approximately 15.6 days after
submission; acceptance to publication is undertaken in 1.9
days (median values for papers published in this journal in
the first half of 2025).
