

Special Issue

Recent Advances in Applied Nuclear and Radiation Physics

Message from the Guest Editors

This Special Issue of JNE will publish some of the most recent advances in the field of theoretical and experimental developments of nuclear and radiation physics. The landscape of the subject is very wide and, therefore, limiting the selection of topics was necessary. This selection is based mainly on the competences of the . This volume will include some of the most recent as well as state-of-the-art experiments, simulations, and novelties on nuclear fusion, radiation therapy, radiation dosimetry and microdosimetry, nuclear, and radiation detectors. Applications to biology, medicine, physics, and engineering are also included in this issue. In addition, the volume will also include review papers, to provide an overview of the field. These reviews cover some of the topics discussed by the regular papers, providing an introduction and a more comprehensive view of these topics. This could be beneficial to young scientists and readers less involved in these areas.

Guest Editors

Dr. Maurizio Angelone

Department of Fusion and Nuclear Safety Technology, Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA), via E. Fermi, 45 00044 Frascati, Rome, Italy

Prof. Dr. Claudio Verona

Dipartimento di Ingegneria Industriale Via del Politecnico 1, Università di Roma "Tor Vergata", I-00133 Roma, Italy

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Dan Gabriel Cacuci
Department of Mechanical Engineering, University of South Carolina,
Columbia, SC 29201, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO and other databases.

Journal Rank:

CiteScore - Q2 (Engineering (miscellaneous))
