

Special Issue

Exclusive Papers of the Editorial Board Members

Message from the Guest Editor

To celebrate the successful launch of *Journal of Nanotheranostics (JNT)*, we are devoting this Special Issue of *JNT* to publishing a diverse selection of exclusive papers from the Editorial Board Members (EBMs). This Issue is intended to bring together expert opinion pieces, educational and critical reviews to put key research and regulatory topics in nanotheranostics into perspective and provide future direction for new investigators in order to push the field forward. In addition, this Special Issue of *JNT* will also consider innovative and original basic, translational and clinical research papers from the laboratories of our EBMs. All EBMs are invited to contribute, and all submissions will be rigorously peer reviewed.

Guest Editor

Prof. Dr. Seyed Moein Moghimi

About the Journal

Message from the Editor-in-Chief

The *Journal of Nanotheranostics (JNT)* is an open-access, peer-reviewed international journal by MDPI providing a critical forum for the dissemination of fundamental, translational, and clinical developments in nanotheranostics. The journal considers outstanding papers on all aspects of nanotheranostics, including targeted therapies, device engineering, computational simulations, molecular imaging, and clinical reports. Manufacturing, ethical, and regulatory issues in nanotheranostics are also considered. Furthermore, *JNT* welcomes papers reporting negative results, as these contribute to advancing the field. The journal also publishes Special Issues on emerging topics that foster new ideas and research directions.

On behalf of the Editorial Board, I warmly invite you to submit your latest research and proposals for Special Issues to *JNT*, and I look forward to receiving your contributions. Together, we will build an outstanding journal.
