### Message from the Guest Editor

Dear Colleagues,

As human activity, modern medicine, and climate change all intensify the impact of fungi on human health, it is imperative that we continue to expand our knowledge and understanding of pathogenic fungi. By investigating the ecological niches and epidemiology of emerging and emerged fungal pathogens we can better perceive acquisition and transmission by human patients. It is also crucial that we investigate novel diagnostics and analyses of clinical data for trends. Major examples of human pathogenic fungi include *Aspergillus fumigatus*, *Cryptococcus neoformans*, and *gattii*, *Candida spp.*, and *Coccidioides spp.*

This Special Issue will highlight the impact of fungal pathogens on human health through comprehensive reviews, original studies, and perspective and opinion pieces.

Dr. Johanna Rhodes

## Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:**— free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPus / SciFinder, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Mycology*) / CiteScore - Q1 (*Ecology, Evolution, Behavior and Systematics*)
