

Special Issue

Hot Topics in Superficial Fungal Infections

Message from the Guest Editor

Superficial fungal infections are prevalent globally, and are commonly seen in clinical practice. This Special Issue will address the diagnosis and treatment of onychomycosis, tinea capitis, tinea pedis, tinea corporis, tinea manuum, tinea cruris, tinea faciei, tinea barbae, and tinea versicolor. Antifungal resistance is becoming more frequent, and is problematic when treating patients with superficial fungal infections. Therefore, in this Special Issue on “Hot Topics in Superficial Fungal Infections”, we invite colleagues to contribute original research papers or reviews on all aspects of the pathogenesis, diagnosis, treatment, and recurrence of superficial fungal infections to *Journal of Fungi*.

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin

Hackensack Meridian Health Center for Discovery and Innovation, 340
