

Special Issue

Pathogenesis and Treatment of *Candida* Species

Message from the Guest Editor

Fungal pathogens mainly cause severe infections in immunocompromised patients. Importantly, the recent emergence of a novel multi-drug-resistant *Candida auris* which predominately colonizes in the skin complicates the existing issue. This Special Issue on “Pathogenesis and Treatment of *Candida auris*” will concentrate on describing the various aspects of this emerging novel pathogen. The focus of this Special Issue will be placed on studies related to antifungal resistance, drug discovery, microbial and host factors regulating the colonization and pathogenesis, as well as animal models pertaining to *Candida auris*.

- *Candida auris*
- antifungal resistance
- skin colonization
- animal models
- drug discovery

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin
Hackensack Meridian Health Center for Discovery and Innovation, 340
Kingsland Street, Nutley, NJ 07110, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
