

Special Issue

Fungal Biofilms, 3rd Edition

Message from the Guest Editors

Fungal infections are an important and increasing global threat, carrying not only high morbidity and mortality rates, but also high healthcare costs. Without an effective response, it is predicted that 10 million people will die per year as a result of multidrug-resistant pathogens. A high percentage of the mortalities caused by fungi are known to be biofilm-related. This Special Issue, "Fungal Biofilms, 3rd Edition", is intended to cover the state of fungal biofilm research, from virulence and pathogenicity, to new compounds with antibiofilm and antifungal activity. We welcome reviews and original research articles covering the development/evaluation/validation of recent studies, especially those regarding multidrug resistance.

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin

Hackensack Meridian Health Center for Discovery and Innovation, 340
Kingsland Street, Nutley, NJ 07110, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
