

## Special Issue

# Fungal Endophytes in Agriculture and Ecosystems

### Message from the Guest Editors

This Special Issue will explore the diversity and role of fungal endophytes in ecosystems and how such knowledge can be applied to agriculture, forestry, and the environment. Endophytic fungi include any fungus living within any part of the plant, including mycorrhizal symbionts. Topics relating to agriculture will include production, sustainability, biocontrol, integrated pest management, and stress resistance. Wider environmental roles of fungal endophytes in ecosystems will also be explored, including applications in phytoremediation and forestry. Interactions of endophytic fungi with other microorganisms in the phytobiome will be covered, including bacterial, protist and soil microfauna.

### Guest Editors

Prof. Dr. Trevor R. Hodkinson

Botany, School of Natural Sciences, Trinity College Dublin, The University of Dublin, Dublin D2, Ireland

Dr. Brian R. Murphy

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
