

Special Issue

Fungal Research in Italy

Message from the Guest Editor

Italy boasts a long tradition in mycological research, a scientific field that studies fungi in all their contributions to global health or disease. This special issue of the *Journal of Fungi* is dedicated to fungal research in Italy, highlighting the actual significant contributions of Italian researchers and laboratory scientists in basic, clinical, or diagnostic studies to combat fungal diseases. The aim of this issue is to provide a comprehensive overview of the most recent and innovative research, promoting dialogue and collaboration among scientists, clinicians, and researchers. The published articles will explore a broad range of medical mycology topics, including advanced diagnostic techniques and new therapies for fungal infections.

We invite all Italian researchers engaged in this field to contribute with their articles, to create an issue that reflects the vitality and diversity of fungal research in Italy.

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin
