

Special Issue

Breeding and Metabolism of Edible Fungi

Message from the Guest Editors

Edible fungus has attracted more and more attention because of its role in food, medicine, and ecology. There are limited edible mushroom resources collected at present, and few of them can be artificially cultivated. The metabolites of edible fungi are of high value, such as polysaccharides and ganoderma acid, which have high medicinal value; laccase, etc., which are used for environmental bioremediation; and volatile aromatic components, which are widely used in food. However, strain resources suitable for the efficient cultivation and production of metabolites are scarce.

This Special Issue of "Breeding and Metabolism of Edible Fungi" will focus on the collection and classification of wild resources, breeding methods and their underlying mechanisms, genetic manipulation, biosynthesis of active products, structure and activity of metabolites, and applications of metabolites.

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin

Hackensack Meridian Health Center for Discovery and Innovation, 340
Kingsland Street, Nutley, NJ 07110, USA

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPIus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
