

## Special Issue

# Fungal Pathogens in Postharvest Fruit Diseases: Control and Management

### Message from the Guest Editors

With the vigorous development of the global fruit and vegetable industry, postharvest diseases have become a key factor affecting the fruit's quality, extending its shelf life, and ensuring the stability of the fruit supply chain. Fungal pathogens play a significant role in the occurrence and spread of postharvest fruit diseases, causing substantial economic losses to the fruit industry. This Special Issue aims to gather the latest research findings in the field of postharvest fruit fungal disease control from around the world and to deeply explore the pathogenic mechanisms of fungal pathogens, the occurrence patterns of diseases, green control techniques, and preservation management strategies. By integrating research results from multiple disciplines, this Special Issue will provide a theoretical basis and technical support for the scientific control of postharvest fruit diseases, promote the innovation and development of fruit preservation technology, and contribute to the sustainable development of the fruit industry.

### Guest Editors

Dr. Qiuli Ouyang

School of Chemical Engineering, Xiangtan University, Xiangtan 411105, China

Dr. Fang Zhang

College of Food Science and Engineering, Ocean University of China, Qingdao 266003, China

### Deadline for manuscript submissions

31 December 2025

## About the Journal

### Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

### Author Benefits

#### Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
