Fungal Infections in Animals

Message from the Guest Editors

In an era when the emergence of antifungal-resistant pathogens is challenging the understanding of fungal infections in animals, it has become increasingly urgent to uncover the mechanisms that enable opportunistic and pathogenic fungi to cause disease in domestic animals, wildlife, and, in some cases, humans. From yeasts to molds, this Special Issue aims to collect leading research regarding the epidemiology, host–fungi interactions, fungal pathogenicity, and the development of therapeutic and preventive measures against fungal diseases in animals.

Studies related to the microbiota balance inside the animal host have confirmed the role of microorganism communities in the behavior, immunity, and genetics of the host. Studies pertaining to the population-level consequences of fungal infections threatening wildlife and food security. This Special Issue also welcomes information regarding the interaction between fungal agents and the animal host microbiota. **Keywords:**

- mold
- yeast
- animal
- pet
- wildlife
- bird
- poultry
- microbiota
- antifungal
- resistance

About the Journal

Message from the Editor-in-Chief

The *Journal of Fungi* (JoF, ISSN 2309-608X) is an international, peer-reviewed, scientific, open access journal that provides an advanced forum for studies related to pathogenic fungi, fungal biology, and all other aspects of fungal research. Research articles, reviews and other contents are released on the Internet immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. David S. Perlin

Hackensack Meridian Health Center for Discovery and Innovation, 340
Kingsland Street, Nutley, NJ 07110, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Mycology) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
