

# Special Issue

## Feature Papers in Ecotoxicology

### Message from the Guest Editors

This Special Issue is a curated compilation dedicated to exploring the intricate relationships between pollutants and ecosystems. It aims to shed light on the multifaceted impact of contaminants on organisms while emphasizing innovative approaches and emerging trends in this critical field of study. This Special Issue seeks to consolidate the latest advancements and diverse perspectives within the field of ecotoxicology. It aims to foster a comprehensive understanding of the complex interplay between pollutants and ecological systems, providing a platform for sharing groundbreaking research, methodologies, and insightful analyses. The suggested themes include, but are not limited to, the following:

- Emerging contaminants: Exploring the impacts of new pollutants on organisms.
- Multi-trophic effects: Understanding contaminant effects across different levels of the food chain.
- Adaptive strategies: Examining the resilience of species to environmental stressors.
- Methodological innovations: Showcasing novel approaches for assessing ecotoxicological risks.
- Ecosystem resilience: Investigating mechanisms for ecological recovery from contaminant exposure.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. François Gagné

Aquatic Contaminant Research Division, Environment and Climate  
Change Canada, 105 McGill, Montreal, QC H2Y 2E7, Canada

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, ESCI (Web of Science), PubMed,  
PMC, CAPIus / SciFinder, Embase, and other databases

##### Journal Rank:

JCR - Q1 (Toxicology) / CiteScore - Q2 (Pharmacology)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is  
provided to authors approximately 22.7 days after  
submission; acceptance to publication is undertaken in 3.9  
days (median values for papers published in this journal in  
the second half of 2025).
