Message from the Guest Editors

Dear Colleagues,

Cancer diagnosis and treatment is entering the era of precision medicine, which aims to provide specific measures for patients with different characteristics to create diagnostic, prognostic and treatment strategies that accurately meet the needs of each patient. The Special Issue aims to allow researchers to share innovative translational research, recent advances, and new insight into disease and novel preclinical/clinical technologies in the field of personalized medicine and precision medicine for PC.

Potential topics may include (but not limited to):
