Gynecological Cancer: Clinical Research and Personalized Medicine

Guest Editor:

Dr. Ottavia D'oria

1. Department of Woman's and Child's Health, Obstetrics and Gynecological Unit, San Camillo-Forlanini Hospital, Rome, Italy 2. Department of Medical and Surgical Sciences and Translational Medicine, PhD Course in "Translational Medicine and Oncology", Sapienza University of Rome, Viale dell'Università, 37, 00185 Rome, Italy

Deadline for manuscript submissions:

10 July 2024

Message from the Guest Editor

Thanks to the advances in science and evidence-based medicine, the personalized diagnostic and therapeutic path is mandatory for all patients.

Although this concept can be extended to all branches of medicine, it is even more important in the gynecological and obstetric field, where a wide range of diagnostic and treatment options are available. Tailored treatment selection is crucial, taking into account each woman's medical history and the unique emotional and psychological concerns that are common for women during their entire life.

Overall, clinical research and personalized medicine hold the potential to revolutionize women's healthcare by providing more effective and targeted treatments that are tailored to individual women's unique characteristics and needs.

I am honored to invite you to consider this Special Issue for submission of original research, meta-analysis and review papers about clinical research and personalized medicine in gynecological cancer.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
