Neuromodulation in the Clinical Treatment of Psychiatric Disorders

Message from the Guest Editor

Dear Colleagues,

Neuromodulation techniques, including transcranial magnetic stimulation (TMS), magnetic seizure therapy (MST), electroconvulsive therapy (ECT), theta burst stimulation (TBS), transcranial direct current stimulation (tDCS), transcranial alternating current stimulation (tACS), vagus nerve stimulation (VNS) and deep brain stimulation (DBS), have been widely applied in the treatment of major psychiatric disorders, such as major depressive disorder (MDD), bipolar disorder (BD) and schizophrenia, in clinical practice. This Special Issue of the *Journal of Personalized Medicine* aims to highlight the current state of the science and showcase some of the latest findings in the field of neuromodulation in the clinical treatment of psychiatric disorders and will comprise original research articles, reviews, systematic reviews and meta-analyses.

Dr. Wei Zheng

*Guest Editor*

Deadline for manuscript submissions: 30 June 2023

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: — free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (Medicine (miscellaneous))
