Message from the Guest Editor

Dear Colleagues,

Endoprosthetic treatment of the hip and knee joints has been an unparalleled success story over the past few decades: the rate of satisfied patients as well as the service lives of the prostheses have been steadily increased.

However, this should not hide the fact that a small percentage of patients do not benefit from the procedure and report the persistence of symptoms without a clear cause being identified. For this reason, continued intensive research of the subject is needed.

This Special Issue is dedicated to new innovative and personalized approaches in hip and knee arthroplasty to further improve the existing good quality of care.

I would be pleased if you could contribute an original article, whether basic or clinical research, on the topic of "Innovations in Knee and Hip Arthroplasty", to our Special Issue.

With best regards,

Prof. Dr. Günther Maderbacher

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
