Message from the Guest Editors

Dear Colleagues,

Chronic pain, experienced by approximately 20% of the world's population, is a major public health problem with enormous social and economic impact. In the context of the complex and not always well-known pathophysiological and psychological mechanisms behind clinical management of chronic pain, we would like to emphasize that patient preferences are important for treatment effectiveness and adherence. Multidisciplinary pain management programs often include multidisciplinary therapeutic strategies such as pharmacological therapy and technology-based approaches, which could be delivered through disease bespoke apps or combined devices. Therefore, innovate interventions that aim to achieve healthy levels of activity and self-management for people with chronic pain. We invite investigators to contribute original research, such as observational, experimental or systematic review and meta-analysis as well as case series that focus on innovative clinical treatment strategies that may aid in the management of chronic pain.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
