Message from the Guest Editors

Dear Colleagues,

Personalized medicine can predict the risk of underlying diseases through more accurate diagnosis, provide more effective and targeted treatment, and design the best treatment plan for patients, in order to maximize the therapeutic effect and minimize the side effects and even prevent the occurrence of diseases. New and personalized diagnostics and treatment innovations are necessary steps to improve the quality of treatment and quality of life for patients with otolaryngology-head and neck diseases.

This Special Issue is dedicated to personalized medicine in otolaryngology-head and neck surgery. All original research and review articles investigating personalized diagnostic and therapeutic approaches are welcome. Particular attention will be paid to papers that propose future management of patients considering the patients' features, individualities, and new technologies.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
