Message from the Guest Editors

Dear Colleagues,

The next level of reliability and efficiency of digital processes in dentistry needs to be put to the scientific test. Optical impression taking using state-of-the-art scanning techniques, as the linchpin of digitization, has a decisive impact on productivity and growth. Are patient engagement and shorter treatment time with higher esthetics in line with personalized medicine? Do multi-platform systems deliver on their promise of predictable and long-term treatment outcomes? Are plug-and-play solutions in the practice still future-proof, or is support from remote teams the new game-changer? Let us answer these questions together with well-founded scientific studies. Clinical as well as laboratory research is most welcome. I look forward to your contributions.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
