Deadline for manuscript
submissions:
15 December 2024

Message from the Guest Editor

Giving the promising potential in neuroscience biomarkers and personalized medicine, the aim of this Special Issue is to improve the scientific evidence surrounding neurocognitive and psychiatric disorders to provide significant data for early diagnosis and effective treatment. We encourage authors to submit papers pertaining to neurodegenerative disorders, especially Alzheimer's disease. An area of special emphasis is the brain–behaviour relationship in aging science, too, with particular focus on cognitive and motor predictors of decline. Manuscripts reporting scientific efforts made to identify biomarkers for prevention, diagnosis, and drug and psychotherapy treatment response in psychiatric patients are also welcome.

Special Issue

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.
Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
