Deadline for manuscript submissions:

closed (10 July 2023)

Message from the Guest Editor

Dear Colleagues,

Recent clinical trials have shown promising results in immunotherapy for cancer treatment. However, cancer immunotherapy is suitable for only a small percentage of cancer patients. To expand the patient population that can be benefit from tumor immunotherapy, it is essential to understand the key mechanisms that generate the immunosuppressive tumor microenvironment (TME).

We invite authors to submit studies on cancer immunotherapy or comprehensive review summaries of exciting new advances in the field.

This Special Issue aims to shed light on cancer metabolism, with a special focus on immunotherapy, for researchers, clinicians, and physicians who are interested in cancer immunotherapy.

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
