Message from the Guest Editors

Dear Colleagues,

The worldwide prevalence of neurological and neurosurgical diseases is growing on an epidemic scale. The early detection and prompt treatment of these diseases are essential for improving functional outcomes and decreasing economic health burdens. For this, modern molecular, biochemical, pathophysiological, and equipment studies are required, enabling a personalized approach to the choice of treatment.

We are pleased to invite you to submit papers detailing the results of translational research on neurological and neurosurgical diseases aimed at improving the prevention, diagnosis, risk assessment, and treatment of neurological and neurosurgical diseases from the standpoint of personalized medicine.

This Special Issue aims to familiarize physicians and researchers with the latest advances in the translational research of neurological and neurosurgical diseases from the standpoint of personalized medicine.

We look forward to receiving your contributions.

Dr. Lu-Ting Kuo

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous)*)
