2. Department of Psychiatry, University of Nevada, Las Vegas, NV 89154, USA
3. College of Osteopathic Medicine, Touro University Nevada, Las Vegas, NV 89014, USA

Deadline for manuscript submissions:

closed (10 August 2024)

Message from the Guest Editor

Although pharmacogenomic research in psychiatry is not advanced enough to provide a genetic basis for screening and developing new molecules, it offers significant promise for future studies. Based on this background, we launched this Special Issue as a platform to publish studies from researchers employing various research methods and technologies to study psychopharmacological advances in psychiatry. We welcome original papers, reviews, or meta-analyses based on animal and human studies. We will consider papers reporting observational, clinical trials, genetics, imaging, computational, health service research, and ecological and in vitro data.

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank: CiteScore - Q1 (Medicine (miscellaneous))
