Message from the Guest Editor

We are pleased to announce the launch of a new Special Issue, “Current Trends and Future Challenges in Rheumatology”.

This Special Issue aims to elucidate the most recent innovations in prevention, early diagnosis, and treatment in rheumatology.

There are still many underexplored aspects of the role of constitutive (genes, microbiota, biopsy patterns, and gender) and external (infections and lifestyle) factors in rheumatic diseases. Modern medicine is oriented to develop innovative integrated systems (algorithms and machine learning) and new biomarkers to predict different phenotypes and severity. The COVID-19 pandemic changed many views, introducing “smart medicine” with the implementation of non-face-to-face visits with telemedicine and innovative uses of imaging (ultrasound, magnetic resonance, HRCT, and PET), which had important consequences for the knowledge of emerging underestimated rare diseases.

We are soliciting original articles, meta-analyses, reviews, and case series related to future challenges in rheumatology.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, ‘omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q1 (Medicine, General and Internal) / CiteScore - Q2 (*Medicine (miscellaneous)*)
