USA

Deadline for manuscript  
submissions:

**closed (1 October 2022)**

### Message from the Guest Editors

Dear Colleagues,

The US healthcare infrastructure includes 637 distinct health systems and more than 1400 community health centers. Over the last 10–15 years, a growing number of these health systems and health centers have initiated Genomic Medicine Cohorts that link genotype or sequencing data to clinical data in order to drive research and clinical care.

We are inviting you to submit a manuscript focused on an important aspect of the genomic medicine cohort at your health system or health center to this Special Issue of the *Journal of Personalized Medicine*. This issue will be the first of its kind to include such efforts across the broad spectrum of work being done at US-based institutions.

Prof. Dr. Michael F. Murray

Dr. Noura S. Abul-Husn

## Message from the Editor-in-Chief

*Journal of Personalized Medicine* is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, PubMed, PMC, Embase, and other databases.

**Journal Rank:** CiteScore - Q1 (Medicine (miscellaneous))
