Target Discovery in Precision Medicine

Guest Editor:

Dr. William C. Wright

St Jude Children's Research Hospital, Memphis, TN, USA

Deadline for manuscript submissions:

closed (10 July 2022)

Message from the Guest Editor

This Special Issue aims to highlight current trends in target discovery research as well as their clinical applications in diseases related to precision medicine. Targets are defined broadly and can include things such as single-nucleotide polymorphisms (SNPs), RNA/protein expression, and metabolites.

We invite submissions to this Special Issue which include original research, review articles, and data analyses related to the discovery of targets which may be of use in precision medicine. We welcome articles relating to any disease.

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, and other databases.

Journal Rank: JCR - Q2 (*Medicine, General & Internal*) CiteScore - Q2 (*Medicine (miscellaneous*))
