Special Issue

Advances in Prenatal Diagnosis and Maternal Fetal Medicine

Message from the Guest Editor

We are pleased to invite you to contribute to the Special Issue titled "Advances in Prenatal Diagnosis and Maternal Fetal Medicine" in the *Journal of Personalized Medicine*. This Special Issue aims to compile a comprehensive collection of the latest research and developments in prenatal diagnosis and maternal–fetal medicine, aligning with the journal's commitment to personalized healthcare. By focusing on this specialized area, we seek to highlight innovative approaches and foster the dissemination of knowledge that can drive personalized interventions and improve clinical practices in maternal and fetal health.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on "omics"-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical

subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2. Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
