Breast Cancer: Biomarkers and Clinical Management

Message from the Guest Editors

In order to anticipate tumor detection, in very dense and young breasts, we are pleased to invite the scientific community and experts in this field to present their innovative research and studies in the following areas:

- Imaging: CEM (contrast enhancement mammography)
- Imaging: MRI (screening and ultrafast MRI and DWI) in young women
- New protocols and guidelines
- The application of AI algorithms for detection and biopsy guidance
- Advanced genetic screening techniques
- Clinical and genetic biomarkers
- Genomics and radiomics for the identification of therapeutic targets
- Analysis of the correlation between tumor occurrence and gut bacterial flora patterns
- Advances in anatomic pathology
- Personalized medicine for the treatment of breast cancer
- Advances in therapeutic lines (in situ Ca,B3)
- New surgical approaches
- New non-surgical approaches (cryoablation techniques, for example)
- New radiotherapy approaches
- New medical therapy approaches (chemotherapy and immunotherapy)

We welcome the cooperation of all researchers dedicated to advancing the field in question.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
