

Special Issue

Personalized Medicine for Maternal–Fetal Medicine

Message from the Guest Editor

Personalized medicine is transforming maternal–fetal care, evolving from traditional one-size-fits-all approaches to targeted therapies that consider individual genetic, environmental, and lifestyle factors. This paradigm shift is particularly crucial in obstetrics, where early detection and customized interventions can significantly improve outcomes for both mother and child. This Special Issue will explore advances in managing diseases in pregnancy, including endometriosis, preterm birth, preeclampsia, gestational diabetes, and other complex conditions.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
