

## Special Issue

# Precision Medicine in Neurooncology and Neurosurgery for the 21st Century, 2nd Edition

### Message from the Guest Editors

Recent advances in brain tumour imaging, genomics and therapeutic technology are now allowing for a precise and tailored approach to the management of patients with brain tumours. This is essential given the heterogeneity of these tumours as well as the challenges of surgery in eloquent brain which thus far have confounded the outcomes. In this Special Issue, we aim to provide the readers with a comprehensive collection of cutting-edge articles exemplifying this personalised approach to brain tumours. We hope this sharing of ideas will further fuel efforts towards more effective and safer therapies for brain tumours. We would welcome original basic science and clinical research papers and review articles epitomising this ethos.

Dr. José Pedro Pedro Lavrador

## About the Journal

### Message from the Editor-in-Chief

*Journal of Personalized Medicine (JPM)*, ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.
