

Special Issue

Personalized Medicine in Gynecology and Obstetrics

Message from the Guest Editors

This special issue focused on techniques for early detection of genetic disorders, fetal risk assessment, and fetal health monitoring. In addition, we are interested in research on personalized endocrine therapies in gynecological health, including the latest approaches for diagnosing and managing uterine fibroids and endometriosis.

Furthermore, we are open to exploring metagenomics and epigenetics, with an emphasis on how the microbiome and epigenetic changes affect treatment options and pregnancy outcomes. Pharmacogenomics, which adjusts drug regimens to genetic profiles for better efficacy and safety. Through genetic testing for evaluation and prevention and personalized fertility treatments.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
