

Special Issue

Precision Medicine in Systemic Sclerosis and Idiopathic Inflammatory Myopathies

Message from the Guest Editors

This Issue will focus on the emerging role of precision medicine in the diagnosis, treatment, and management of systemic sclerosis (SSc) and idiopathic inflammatory myopathies (IIMs). Systemic sclerosis and idiopathic inflammatory myopathies are chronic autoimmune diseases characterized by a complex pathophysiology and variable clinical outcomes. As the burden of these diseases grows, personalized approaches to treatment and diagnosis are becoming increasingly important. Over the past decade, significant strides have been made in understanding the molecular mechanisms underlying SSc and IIMs, but challenges remain in translating these findings into clinical practice. Precision medicine, through the use of biomarkers, genetic profiling, and tailored therapies, holds promise for improving patient outcomes. This Special Issue aims to highlight recent advances in precision medicine as applied to SSc and IIMs. We seek to explore novel diagnostic tools, personalized treatment strategies, and the role of genetic, environmental, and immune factors in disease progression.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM), ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
