Special Issue

Mental Health: Clinical Advances in Personalized Medicine

Message from the Guest Editors

One in eight people worldwide lives with a mental disorder, making it one of the most common health problems globally. Mental illness not only causes significant physical and emotional suffering but also increases the risk of premature death. Mental health can be influenced by many factors at multiple levels—individual, familial, societal and environmental. Understanding the brain's response to these risk factors and pathological neurocircuitry mechanisms underlying mental disorders is an important step for developing effective treatment plans and facilitating recovery for psychiatric patients. Therefore, innovative approaches to diagnose and treat mental illness are urgently needed.

The Special Issue "Mental Health: Clinical Advances in Personalized Medicine" aims to explore the mechanisms of mental illnesses of different etiologies and to discover advanced methods for diagnosis and treatment. We invite authors to submit original works in the above fields in the form of clinical research, literature review, translational research, meta-analysis, etc.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (JPM; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. JPM publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). JPM is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
