Orthopedic Diseases: Surgical Treatments and Personalized Rehabilitation Strategies

Message from the Guest Editor

The integration of surgical advancements with comprehensive rehabilitation ensures better long-term outcomes, helping patients regain independence and improve their quality of life. The collaborative efforts of orthopedic surgeons, physiotherapists, and other specialists remain pivotal in managing these conditions effectively. This Special Issue is dedicated to all clinicians and researchers involved in the care and management of orthopedic diseases. It aims to present the current state of the art in surgical treatments and rehabilitation strategies, while exploring potential future therapeutic and research avenues to support healthcare professionals. Its focus spans various disciplines, including orthopedic surgery, physical therapy, sports medicine, and rehabilitation sciences, as well as general medicine.

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine is one of the few journals that covers the diverse areas involved in the field, including research at basic, translational, and clinical levels. It focuses on “omics”-level studies that seek to define the basis of interindividual variation in susceptibility for a disease, its prognosis or definition of clinical subsets, and response to therapy (pharmacogenomics). We are also interested in systems biology as it relates to interindividual variation, and research on new methodologies, informatics, and biostatistics, in the aforementioned areas.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker

Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W.F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:

indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:

CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 25 days after submission; acceptance to publication is undertaken in 5.8 days (median values for papers published in this journal in the second half of 2025).
