Special Issue

New Trends and Challenges in Digital Dentistry

Message from the Guest Editors

Digital revolution technologies have spread to all fields and are changing the world. Dental practice and dental research are no exception. Digital dentistry is a broad term, comprising any technology or device that joins the digital or computer controlled components dentistry. Some areas, such as practice, patient education and records management, and digital images, could be considered digital dentistry technologies, which have gradually affected the dental care field throughout the 21st century. Artificial intelligence has the potential to transform care delivery by improving health outcomes and patient safety. Artificial intelligence will power the digital age. Therefore, the focus of this topic is to bring together manuscripts from different areas of research in order to display all aspects of digital dentistry and artificial intelligence applied to dental research. It is expected that some of the works represent the future developments in the field. Groups from all specialties and fields are encouraged to submit original research and comprehensive reviews that provide new insights into this topic. We look forward to receiving your contribution.

1. School of Dentistry, Tuiuti University from Parana, Curitiba 82010-210, Brazil
2. Department of Dentistry, University of the Joinville Region, Joinville 89219-710, Brazil

Deadline for manuscript submissions

closed (15 May 2025)

About the Journal

Message from the Editor-in-Chief

Journal of Personalized Medicine (*JPM*; ISSN 2075-4426) is an international, open access journal aimed at bringing all aspects of personalized medicine to one platform. *JPM* publishes cutting edge, innovative preclinical and translational scientific research and technologies related to personalized medicine (e.g., precision medicine, pharmacogenomics/proteomics, systems biology, 'omics association analysis). *JPM* is covered in Scopus, the Science Citation Index Expanded (SCIE), PubMed, PMC, Embase, and other databases.

Editor-in-Chief

Prof. Dr. Kenneth P.H. Pritzker
Department of Laboratory Medicine and Pathobiology, Department of Surgery, University of Toronto, 6 Queens Pk Crescent W,F, Toronto, ON M5S 3H2, Canada

Author Benefits

High Visibility:
indexed within Scopus, PubMed, PMC, Embase, and other databases.

Journal Rank:
CiteScore - Q1 (Medicine (miscellaneous))

Rapid Publication:
manuscripts are peer-reviewed and a first decision is provided to authors approximately 21.5 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the first half of 2025).
